

Is It Time for You To Take Action On **Cloud Migration**?

In 2022, 94% of businesses used cloud services.¹ If you're considering the benefits of moving your technology off-prem, consider these pros and cons.

Why the Need for the Cloud?

25% of all professional jobs in North America will be remote this year.²

Global end-user spending on cloud services is forecast to grow **20.7% in 2023.**³

The average employee uses **36 cloud-based services** every day.¹

The Pros and Cons of Moving Off-Prem

Pros

- ✓ Secure network access from anywhere
- ✓ Easy scalability to accommodate growth
- ✓ Consistent communications for remote and in-office teams
- ✓ Enhanced customer experience from expanded communication channels
- ✓ Lower infrastructure costs
- ✓ Redundant data backup
- ✓ Maximum uptime

Cons

- ✗ Not all cloud providers offer the same level of cyber security
- ✗ Limited control because infrastructure is managed by the service provider
- ✗ Variability in employee internet connections can impact quality of communication
- ✗ Potential to get locked in with the wrong vendor
- ✗ Sharing cloud resources can negatively impact performance
- ✗ Backup and restore processes might be subject to latency
- ✗ On-site internet downtime means the cloud isn't accessible

In many cases, the benefits to remote and hybrid work teams far outweigh the cons. CommQuotes is the trusted advisor that will provide vendor-agnostic guidance, making it easy to find the right solutions from the right providers at the best possible price. **Get in touch with us today** to talk about moving your technology off premises.
